

Daan Tech is bringing disruption to your kitchen.

Daan Tech has developed **Bob**: the world's smallest, fastest, smartest and cutest dishwasher ever, that **will save millions of people** living in small apartments or RVs from washing the dishes.

Bob is a high-end **2 place settings countertop dishwasher** that cleans and dries the daily dishes of 2 people, in 20 minutes, with only 2.4L (0.6 US Gal) of water which means six times less than handwashing. Bob is designed to last at least **10 years** and offers a broad range of colors (24 combinations) and it is highly customizable.

After a successful pre-sales campaign in France that resulted in 6000 units sold, Bob will be available for pre-orders in the US and Western Europe in 2020. Shipping will begin in **September 2020** by pre-order number. **If you want to be first to get yours, book it on: www.daan.tech Starting at \$399 or £349 only.**

Bob is made in France taking advantage of a strong know-how on **manufacturing luxury products** since Daan Tech works with top tier suppliers working for the luxury and automotive industry, including LVMH, AMG and BMW.

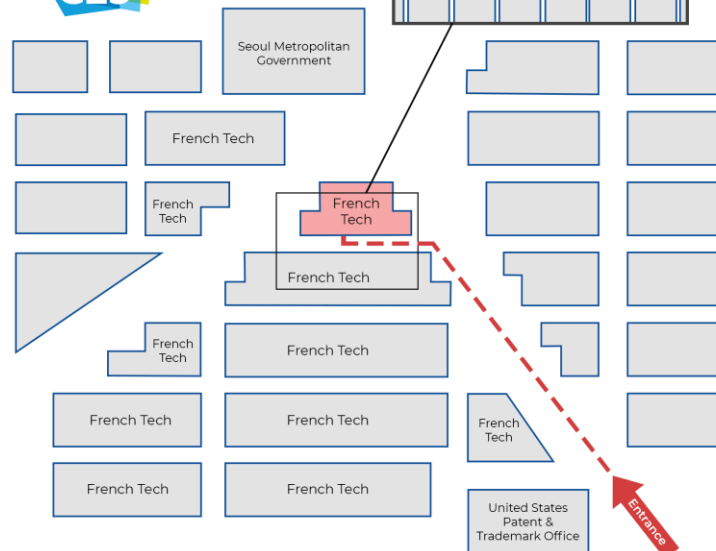

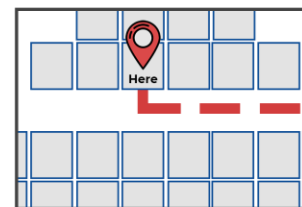

If you want to see what the **future of the home appliances industry** looks like, **come to meet Bob** and the Daan Team at CES 2020, booth 50819, Sands Expo, Eureka park.

Throw away the sponge. Get **Bob**.

The next revolution is here:
